Rabat · Oujda, Morocco

SKILLS

AI & Machine Learning
PyTorch, TensorFlow, scikit-learn, Hugging Face, Pandas, NumPy

Vision & NLP
OpenCV, SIFT, RANSAC, DistilBERT, TF-IDF, embeddings

Generative AI
LLMs, RAG, Ollama, LangChain, CrewAI

Data
SQL, MySQL, MariaDB, Oracle 19c, MongoDB, Hadoop, Hive, Spark, Sqoop

Development
Python, Java, C, Bash, Flask, FastAPI, HTML/CSS/JS

Cloud & tools
Azure, Docker, Git, Apache, XAMPP, Power BI

STRENGTHS

Rigour, autonomy, organisation, communication, teamwork

LANGUAGES

Arabic — native

French — fluent (B2)

English — upper intermediate

Spanish — beginner

INTERESTS

Cooking, arts and crafts, interior design, sport, travel, volunteering

Marwa Ayyadi

Big Data & Artificial Intelligence Engineering Student

Applying for: Artificial Intelligence Engineer — ATLAN Space · ref. AI-DEV-2025

PROFILE

Fifth-year Computer Engineering student specialising in Big Data & AI at the International University of Rabat (graduating June 2027). I have integrated an LLM into a company application, trained and evaluated ML, Deep Learning and NLP models in a team, and led a platform project on my own, from the initial study to the deployment guide. I want to join an AI team working on computer vision and NLP, with a path towards MLOps.

EXPERIENCE

Intern — Online training platform (Moodle LMS)
Jun – Jul 2026

AMMPS (Moroccan health-products agency), IT department · 5 weeks · individual project

- Compared four LMS solutions (Moodle, Google Classroom, TalentLMS, Chamilo) and justified the choice of Moodle
- Set up Apache, PHP 8.3 and MariaDB 10.11; installed and configured Moodle 5.2 for business use
- Diagnosed blocking issues with logs, phpinfo() and SQL; closed self-registration and protected internal files
- Wrote a step-by-step installation guide to prepare the production rollout

Intern — Intelligent chatbot on a local LLM
Jun – Jul 2025

Nextronic, Technopark Casablanca · pair project

- Built "Sunny", a web chatbot connected to local LLMs (Llama 3.2, Qwen3) on an internal server via the Ollama REST API
- RAG system (LangChain, FAISS) to query the company's internal documents
- Flask server and HTML/CSS/JS interface; testing, response-time optimisation and documentation

Intern — Application acceptance testing
2024

ONCF (national railway office), Rabat-Agdal

- Wrote test sheets and deployment deliverables for the "Fleet Management" application
- Functional analysis, application testing, bug reports and schedule tracking (Gantt)

AI & DATA PROJECTS

Product Review Intelligence · deep learning, multi-agent
Fine-tuned DistilBERT (PyTorch, Hugging Face) for 3-class sentiment: 73% accuracy, 0.74 macro F1; used as a tool by a three-agent system (CrewAI, FastAPI, Ollama)

Panorama Image Stitching · computer vision
OpenCV pipeline with SIFT, FLANN, RANSAC and multi-band blending: 75–97% inliers

Toxic Comment Classifier · NLP
Multi-label classification of 159,571 comments (TF-IDF, scikit-learn): 0.981 ROC-AUC, Streamlit app

AI Career Advisor · RAG, NoSQL
Guidance chatbot: embeddings, cosine similarity, Llama 3, MongoDB Atlas

ASHRAE energy analysis · Big Data
20 million readings, HDFS, Hive, Spark MLlib; my role: Sqoop transfers with MySQL, report and presentation

Also: Oracle 19c decision-support platform, Fun Translator (Azure serverless). Details in the e-portfolio.

EDUCATION

Engineering Degree — Computer Engineering, Big Data & AI
2022 – 2027

International University of Rabat (UIR)

Machine Learning, Deep Learning, NLP, Computer Vision, Big Data, NoSQL, Data Warehouse, Cloud

Baccalaureate in Mathematical Sciences (A), French option
2022

Lycée El Zaitoun, El Aioun
